

GENERAL TRACE DETECTION

The Rapiscan Learning Academy develops and delivers global, fully comprehensive, high-quality training programs that help create and sustain a competent, professional and well-educated workforce, enhancing service excellence and customer satisfaction.

Our flexibly blended learning, has been developed to ensure that the Rapiscan Learning Academy is your partner of choice for current and future security training.

COURSE OVERVIEW

The increased manufacturing and trafficking of narcotics, with the addition of the growing adeptness of traffickers in carrying narcotics, has made it difficult for law enforcement and criminal justice agencies to locate them. To help overcome this problem, Rapiscan Systems Trace narcotics detection equipment provides precise and fully automatic rapid detection and identification.

Rapiscan Systems offer a one-day **General Trace Detection** course, designed to develop students to understand the machine capability and how its effective use can benefit drug detection within the law enforcement and criminal justice settings. Training can either be delivered at one of our training centres, or at your facility if more convenient.
